# Experiential Math Learning and Brain Training

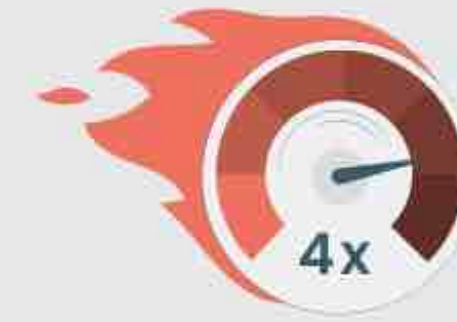

Arithmetic Understanding

Introduction to Cognitive Abilities, keeping in mind the school curriculum of the child

Maths Concepts

Speed Mathematics

Mathematical Thinking Orientation and Technology applications

# Key outcomes and take aways

	30 Sessions	75 Sessions	150 Sessions
4X quicker in Maths	✓	✓	✓
Building fantastic arithmetic foundation	✓	✓	✓
Cognitive Ability Development	✓	✓	✓
First AI Algorithm using Math	—	✓	✓
Logical thinking and Real Life applications of Math	—	✓	✓
Enter the world of Advanced Math	—	✓	✓
Becoming the next gen techie	—	✓	✓
<b>Building right foundations to excel in school curriculum</b>	—	✓	✓
3 Conquest projects	—	✓	✓
Deeper understanding and applying in various STEM Fields	—	—	✓
<b>Pro Speed Math Module</b>			
- Cognitive Skill Mastery	—	—	✓
- Bhanu's Proprietary Methods			
8 Conquest projects	—	—	✓
<b>Premium access to alternate learning modules</b>			
- Customized Learning Trajectories	—	—	✓

# You will learn

## Module 1 1 – 10 sessions

### Introduction to Math and Basics of Speed Math

Place value System, comparison of numbers, L-R addition, place value based addition, subtraction and multiplication

## Module 4 31 – 40 sessions

### Elements of Geometry

Lines, Angles, Properties of Polygons (triangles and quadrilaterals), 3D Geometries

## Module 2 11 – 20 sessions

### Shapes, Mensuration and Basic Algebra

2D Shapes (triangles & quadrilaterals), Area, Perimeter, Variables, Equations

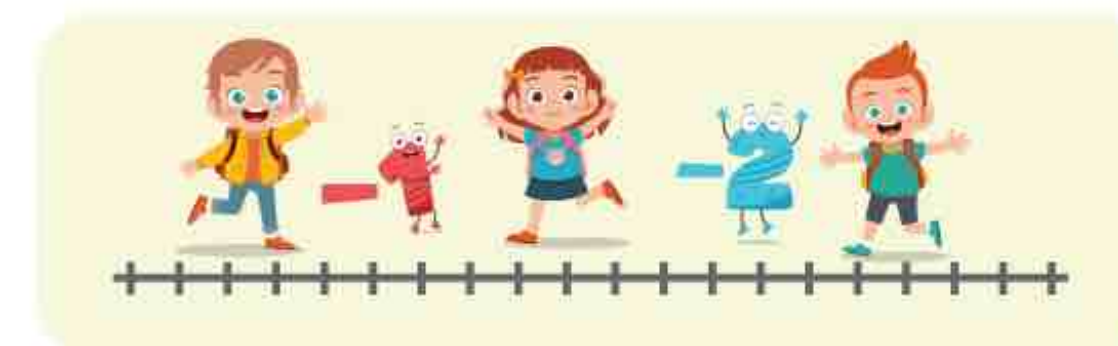

## Module 5 41 – 50 sessions

### Properties and Types of Numbers – THE REAL LINE

Abstract math, properties of numbers, types of numbers – whole numbers, fractions, decimals, rational numbers, irrational numbers

## Module 3 21 – 30 sessions

### Advanced Arithmetic

Negative Numbers, Integers, Division, Fractions, Decimals

## Module 6 51 – 60 sessions

### SETS & Co-ordinate geometry – THE DIMENSION AHEAD

Union, intersection and difference of sets, and properties of sets

# You will learn (cont.)

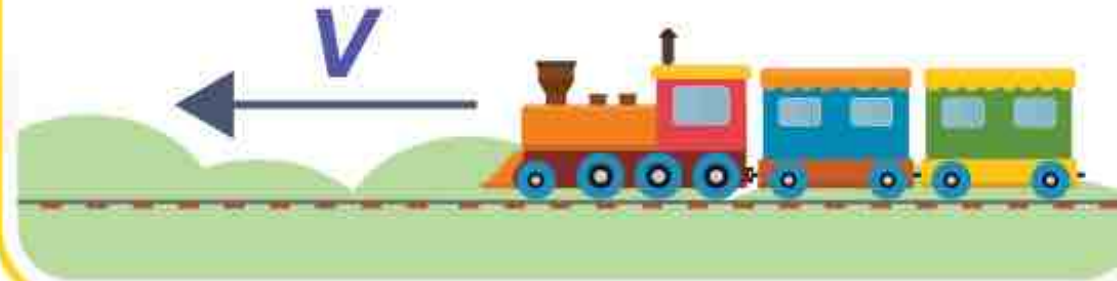

## Module 7 61 – 70 sessions

### Variables & Linear Equations

Find the missing variable, and using linear equation to find the missing value, tree game

## Module 8 71 – 75 sessions

### Solving Practical Questions

Applying concepts in world problems

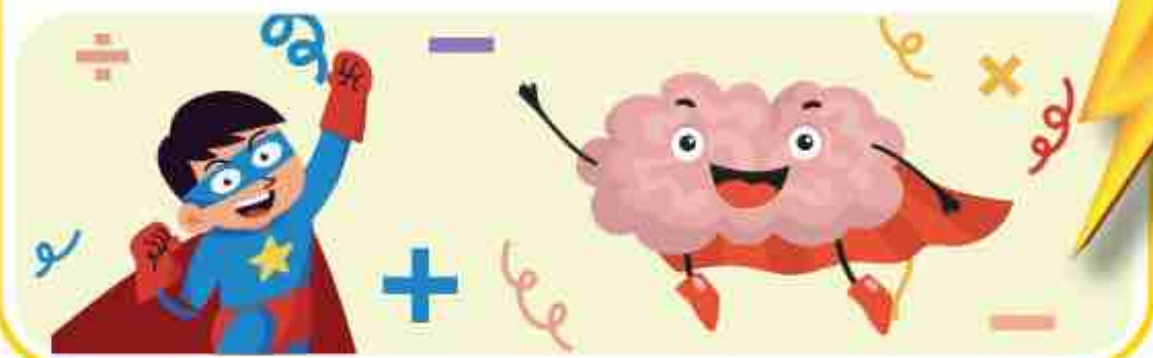

## Module 9 76 – 85 sessions

### Theory of Numbers – Know it all!

Factors, Multiples, LCM, HCF, Primes, Fundamental Theorem of Arithmetic

## Module 10 86 – 95 sessions

### Pro Speed Math

Professional speed math alignment, with cognitive ability games and Bhanu's techniques to solve problems in your mind, exponents, fraction arithmetic

## Module 11 96 – 105 sessions

### The True AI, ML introduction

Tally, Bar Graph, Pie chart, Scatter Plot, Heat Maps, understand and interpret data

## Module 12 106 – 115 sessions

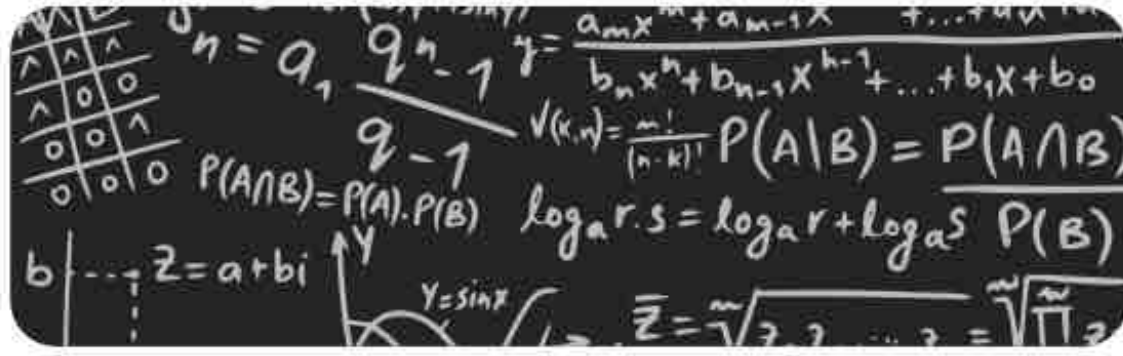

### Math in Music and Art

Time signatures, counting in 7s, Ragas, Symmetry, beauty of nature, architecture, chord progression, basics of music theory using math, fraction and math, time signature, music in set theory

# You will learn (cont.)

## Module 13 116 – 125 sessions

### The Language of Math

Quantifiers, theorems, boolean algebra and introduction to binary

## Module 14 126 – 135 sessions

### World of Finance

Money, fixed cost, variable cost, interest rate, tax, investment, EMI

## Module 16 146 – 150 sessions Mega Project Conquest

Break the password

## Module 15 136 – 145 sessions

### Encrypt, Decrypt – World of Passwords

Caesar Cipher and Cryptography, Trees and graphs, RSA algorithm

## Why parents choose us

**Jhuleka**

My daughter was wonderful at mathematics at the beginning. However, once she started regular schooling, she lost her interest in the subject and could not follow it well. However, Bhanzu's classes have made significant progress in her learning. Even I sit for these classes, as I find the teaching method really engaging. She's able to make that correlation between numbers. For e.g. " $8+2=10$ ", but " $5+5$ " is also 10. She realizes now that different combinations of numbers can also give the same result.

**Deepa**

There was a strong aversion for my child towards math before, but the way of teaching at Bhanzu has made math a fun learning experience for him. He now takes an interest of his own in learning maths. He even teaches us the concepts and formulas he learned in class. Such is the improvement I have seen in him.

**Ravindra**

My daughter earlier used to be afraid of math, as a result, she was really hesitant and lacked the confidence to learn. The classes at Bhanzu have made a tremendous difference. She is very interested in learning math now and I can see her growing interest in the subject. The classes taken by Bhanu are brilliant; they are insightful and engaging. I'm confident the way Bhanzu is teaching her, I can see that progress in her and I'm thrilled about it.

**Vandana**

My son used to find math boring, and he had no interest in it. After joining Bhanzu, I noticed that his interest and curiosity about math have spiked. I can see how he calculates numbers and performs addition, subtraction, and multiplication. He is quick at it and a lot more efficient than before. Bhanzu has made a significant difference.

## How our teachers feel

**Tejaswini Raj**

Right from my interview, I knew that Bhanzu is going to impact my learning experience for good. Not only it is a blessing to work with a profoundly experienced team but it also gives me challenges that help me to hone my work and my efforts. This experience makes me more satisfied with my work.

**Jennifer Priscila**

I'm so glad that I have found this platform called BHANZU, It gave me such a good experience in my journey with lots of new learning every day. With the kids, every day is a new adventure here. Sometimes the parents say, "Ma'am, my kid is really overactive and waiting for your class". Words like these motivates me to keep going. Each day they get better at Maths, but the progress isn't limited to the subject; they learn things from interacting with each other.

**Aparna Lakshmi**

I have had a lot of wonderful experiences with the students at Bhanzu. As a teacher, I have learned that learning involves acceptance, understanding, patience, and energy. Always keeping a smile on the face and connecting with the children in a friendly way make them comfortable, eventually unlocking their potential. I thank all of my fellow trainers for believing in me and encouraging me.

**Prabhjot Kaur**

I am working here since March 2022 and it has been a tremendous experience working here. I really appreciate Bhanzu for giving me this opportunity to serve the children by coming to their level. Parents during the PTM share their beautiful experiences of their student's success journey on a regular basis. Interaction between tutor and student is increasing the confidence level of students day by day. We not only focus on academic improvement but even the holistic development of the student is taken care of in Bhanzu's classes.

## What our students say

**Gokul RV**  
9th Grade

Bhanzu is one of the Best Education Platforms where we can study many new techniques and concepts. I love attending Bhanzu Classes. The teachers in Bhanzu are also friendly and kind. They have made my learning process easier. They provided home works and notes, which helped me a lot. There were also a lot of Hobby Classes and Master Classes conducted by Mr Neelakantha Bhanu Sir, which made learning much more interesting. So I recommend everyone to take Bhanzu Classes.

**Vivaan Puthal**  
5th Grade

Math used to be a very confusing subject for me, but Bhanzu changed that. I like the way the learning is done, especially how we learn through activities and games. The classes taught me the best methods to calculate and solve problems quickly.

**Paarthiv Reddy**  
5th Grade

It's been 8 months since I joined Bhanzu, and I have had a fun time learning maths. My teacher is very sweet and encouraging. She always encourages me to ask for doubts and to learn new things. The techniques and methods for addition and multiplication are really helpful. I can do calculations faster now.

**Debolina Roy**  
6th Grade

Bhanzu's curriculum is really easy to grasp and understand, and the learning process is really fun. I really enjoy solving the worksheets. The teachers are really nice; they take classes very well and make math an interesting subject. The classes at Bhanzu have made learning math an exciting journey for me!
